

Domestic & Commercial Accessories

1. Cable fix strip:

Cable fixing Strip is used as installation attachment for heating cable up to 6.5mm diameter. The fixing strip has flexible C-C spacing in steps of 25mm, hence allows variable watt/m² outputs. Standard packing available in rolls of 25mtrs.

2. Thermoscout:

Even though the heating elements are tough and sturdy, they can still be damaged during installation at the jobsite. Thermo Scout is designed to monitor your heating mats or cables during every step of the installation. It can monitor both heating mats and cables and immediately warns you in case of any damage or failure.

3. Thermostat & Floor Sensor:

To accompany Thermo comfort-heating products are our Programmable Digital Thermostats to maintain a warm and cozy environment. They can offer various settings to suit your requirements and have a built-in temperature sensor to control the temperature of the room.

4. FPC-C & FPC-SR Cable Glands:

Cable gland is used for installation for in pipe application.

5. Thermal Insulation Board:

Thermal Insulation Board is used as a thermal barrier and it reflects the heat upwards into the floor tile instead of allowing heat to penetrate into the sub floor and keeps the floor warmer for longer time.

6. Conduit:

Conduit will keep the power leads & Sensor cables free from mechanical damage.

7. Strapping Tapes:

Strapping tapes are being used to hold the under tile heating cable on floor.

8. Plastic Fixing Strip:

Plastic Fixing Strip are being used to hold the under tile heating cable on floor

9. Bobbin unwinder:

Bobbin unwinder supports to hold the bobbin on surface to make the cable unwinding easy.

10. Roof clips, Hanger Bracket & UV Resistance Cable ties:

Roof clips, Hanger bracket & UV Resistance cable ties are used for installation of TDIT SR products in roof gutter and downspouts application.

11. Aluminium Tape / Glass tape:

Aluminium Tape / Glass Tape are being used to hold the cable on pipe at regular intervals.

12. Power connection Kit & End connection kit:

Power connection Kit & End connection kit is used for power and end termination during field installation.
